SECTION 2. HAZARDS IDENTIFICATION

| GHS classification in accordance with the OSHA Hazard Communication Standard (29 CFR 1910.1200) | | | | |
|---|---|--|--|--|
| Gases under pressure | : | Liquefied gas | | |
| Simple Asphyxiant | | | | |
| GHS label elements | | | | |
| Hazard pictograms | : | | | |
| Signal Word | : | Warning | | |
| Hazard Statements | : | H280 Contains gas under pressure; may explode if heated. May displace oxygen and cause rapid suffocation. | | |
| Precautionary Statements | : | Storage: P410 + P403 Protect from sunlight. Store in a well-ventilated place. | | |

according to the OSHA Hazard Communication Standard

Opteon[™] 448A (R-448A) Refrigerant

| Version | Revision Date: | SDS Number: | Date of last issue: 11/02/2023 |
|---------|----------------|---------------|---------------------------------|
| 8.0 | 03/05/2025 | 1644527-00020 | Date of first issue: 05/18/2017 |

Other hazards

Vapors are heavier than air and can cause suffocation by reducing oxygen available for breathing. Misuse or intentional inhalation abuse may cause death without warning symptoms, due to cardiac effects.

Rapid evaporation of the product may cause frostbite.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance / Mixture : Mixture

Components

| Chemical name | CAS-No. | Concentration (% w/w) |
|-----------------------------------|------------|-----------------------|
| Pentafluoroethane# | 354-33-6 | 26 |
| Difluoromethane# | 75-10-5 | 26 |
| 1,1,1,2-Tetrafluoroethane# | 811-97-2 | 21 |
| 2,3,3,3-Tetrafluoropropene# | 754-12-1 | 19.9 |
| Trans-1,3,3,3-tetrafluoropropene# | 29118-24-9 | 6.965 |

Voluntarily-disclosed substance

SECTION 4. FIRST AID MEASURES

| General advice | : | In the case of accident or if you feel unwell, seek medical ad- vice immediately. When symptoms persist or in all cases of doubt seek medical advice. If inhaled, remove to fresh air. |
|---|---|--|
| | • | If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately. |
| In case of skin contact | : | Thaw frosted parts with lukewarm water. Do not rub affected area. Get medical attention immediately. |
| In case of eye contact | : | Get medical attention immediately. |
| If swallowed | : | Ingestion is not considered a potential route of exposure. |
| Most important symptoms and effects, both acute and delayed | : | May cause cardiac arrhythmia. May displace oxygen and cause rapid suffocation. Gas reduces oxygen available for breathing. Contact with liquid or refrigerated gas can cause cold burns and frostbite. |
| Protection of first-aiders | : | No special precautions are necessary for first aid responders. |
| Notes to physician | : | Because of possible disturbances of cardiac rhythm, ca- techolamine drugs, such as epinephrine, that may be used in situations of emergency life support should be used with spe- cial caution. |

according to the OSHA Hazard Communication Standard

Opteon™ 448A (R-448A) Refrigerant

| Version | Revision Date: | SDS Number: | Date of last issue: 11/02/2023 |
|---------|----------------|---------------|---------------------------------|
| 8.0 | 03/05/2025 | 1644527-00020 | Date of first issue: 05/18/2017 |

SECTION 5. FIRE-FIGHTING MEASURES

| Suitable extinguishing media | : | Water spray Alcohol-resistant foam Carbon dioxide (CO2) Dry chemical |
|--|---|--|
| Unsuitable extinguishing media | : | None known. |
| Specific hazards during fire fighting | : | Exposure to combustion products may be a hazard to health. If the temperature rises there is danger of the vessels bursting due to the high vapor pressure. |
| Hazardous combustion prod- ucts | : | Fluorine compounds Carbon oxides Hydrogen fluoride carbonyl fluoride |
| Specific extinguishing meth- ods | : | Use extinguishing measures that are appropriate to local cir- cumstances and the surrounding environment. Fight fire remotely due to the risk of explosion. Use water spray to cool unopened containers. Remove undamaged containers from fire area if it is safe to do so. Evacuate area. |
| Special protective equipment for fire-fighters | : | Wear self-contained breathing apparatus for firefighting if necessary. Use personal protective equipment. |

SECTION 6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protec- : tive equipment and emer- gency procedures | Evacuate personnel to safe areas. Avoid skin contact with leaking liquid (danger of frostbite). Ventilate the area. Follow safe handling advice (see section 7) and personal pro- tective equipment recommendations (see section 8). |
|---|---|
| Environmental precautions : | Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Retain and dispose of contaminated wash water. |
| Methods and materials for : containment and cleaning up | Ventilate the area. Local or national regulations may apply to releases and dispo- sal of this material, as well as those materials and items em- ployed in the cleanup of releases. You will need to determine which regulations are applicable. |

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Ingredients with workplace control parameters

| Components | CAS-No. | Value type | Control parame- | Basis |
|----------------------------|----------|------------|--------------------|---------|
| | | (Form of | ters / Permissible | |
| | | exposure) | concentration | |
| Pentafluoroethane | 354-33-6 | TWA | 1,000 ppm | US WEEL |
| Difluoromethane | 75-10-5 | TWA | 1,000 ppm | US WEEL |
| 1,1,1,2-Tetrafluoroethane | 811-97-2 | TWA | 1,000 ppm | US WEEL |
| 2,3,3,3-Tetrafluoropropene | 754-12-1 | TWA | 500 ppm | US WEEL |

Engineering measures

: Ensure adequate ventilation, especially in confined areas. Minimize workplace exposure concentrations.

Personal protective equipment

| Respiratory protection | : | General and local exhaust ventilation is recommended to maintain vapor exposures below recommended limits. Where concentrations are above recommended limits or are unknown, appropriate respiratory protection should be worn. Follow OSHA respirator regulations (29 CFR 1910.134) and use NIOSH/MSHA approved respirators. Protection provided by air purifying respirators against exposure to any hazar- dous chemical is limited. Use a positive pressure air supplied respirator if there is any potential for uncontrolled release, exposure levels are unknown, or any other circumstance where air purifying respirators may not provide adequate protection. | | |
|------------------------|---|--|--|--|
| Hand protection | | | | |
| Remarks | : | Take note that the product is extremely cold, which may im- pact the selection of hand protection. Wash hands before breaks and at the end of workday. | | |
| Eye protection | : | Wear the following personal protective equipment: | | |
| 5 / 24 | | | | |

| | Particle Particle | e characteristics e size | : | Not applicable | |

SECTION 10. STABILITY AND REACTIVITY

| Reactivity | : | Not classified as a reactivity hazard. |
|---|---|--|
| Chemical stability | : | Stable if used as directed. Follow precautionary advice and avoid incompatible materials and conditions. |
| Possibility of hazardous reac- tions | : | Can react with strong oxidizing agents. |
| Conditions to avoid | : | This substance is not flammable in air at temperatures up to 100 °C (212 °F) at atmospheric pressure. However, mixtures of this substance with high concentrations of air at elevated pressure and/or temperature can become combustible in the presence of an ignition source. This substance can also become combustible in an oxygen enriched environment (oxygen concentrations greater than that in air). Whether a mixture containing this substance and air, or this substance in an oxygen enriched atmosphere become combustible depends on the inter-relationship of 1) the temperature 2) the pressure, and 3) the proportion of oxygen in the mixture. In general, this substance should not be allowed to exist with air above atmospheric pressure or at high temperatures; or in an oxygen enriched environment. For example this substance should NOT be mixed with air under pressure for leak testing or other purposes. |
| Incompatible materials | : | Avoid impurities (e.g. rust, dust, ash), risk of decomposition. Incompatible with acids and bases. |
